

WOODFIT ACOUSTICS WALL SYSTEM
FLAT LEATHER WOOD PANELLING
ARCHITECTURAL SPECIFICATION

PART 1 – GENERAL

- A. Woodfit Acoustics wall panelling systems covered by this specification shall be the products of Woodfit Acoustics complete in all respects as described herein.
- B. The general conditions and requirements of part 1 of the specification shall apply to all work set out hereunder.
- C. All work shall be carried out according to the manufacturer's instructions, to best practice and standards satisfactory to the clients' representative.

1.01 SCOPE

Woodfit Acoustics shall furnish all materials necessary to the complete installation by the contractor, all in accordance with drawings and specifications. All hanging components shall be supplied by the contractor as detailed and specified.

1.02 RELATED WORK BY OTHERS

- A. Gypsum board partition and wall structure.
- B. Mechanical and Electrical Services including fixtures, connections and fittings.
- C. Paint Finish to surface behind and between panelling.
- D. Acoustic Insulation.

1.03 QUALITY ASSURANCE

- A. **Installer:** Company installing the specified product shall have adequate qualified staff and have successfully completed similar projects over the past 5 years. The installer shall be approved by the manufacturer as qualified to carry out work required.
- B. **Standard:** All work is to be carried out according to best practice and standards; conform to all governing laws, building codes and the following performance criteria.
- C. **Fire Performance Characteristics:** When specifying Woodfit Acoustics panels they conform to Euro Class B and C formerly Class 0 and Class 1 BS476 part 6 & 7 respectively.

Range of Available Fire Certification

Country	Class	Standard	Euro
UK and Ireland	Class 1	B.S.476: Part 7	C
UK and Ireland	Class 0	B.S.476: Part 6 & 7	B
Austria	B1/T1/Q1	B3800	C
Belgium	A1	NBN-S21-203	C
France	M1	NFP 92501	B
Germany	B1	DIN 4102 Teil 1	B
Italy	Classe 1	CSE RF 2/75 A, 3/7	B
Netherlands	Klasse 2	NEN 6065, NEN 6066	C
Scandinavia	In 1	NS 3919	B
Switzerland	BKZ 5.3	VKF Regulations	C
Singapore	Class 1	B.S.476: Part 7	C
United States	Class 1	UL 723	B

- D. **Environmental Standards:** By specifying products from Woodfit Acoustics you can be sure of working with a company that demonstrates a clear commitment to continually improving environmental performance. We work with our suppliers to meet the requirements of FSC Controlled Standards. Our products come from the most renewable and sustainable sources.

**WOODFIT ACOUSTICS FLAT LEATHER WOOD PANELLING WALL SYSTEM
ARCHITECTURAL SPECIFICATION**

1.04 PROJECT CONDITIONS

Installation shall be done only when the temperature and humidity closely approximate the interior conditions that will exist when the building is occupied. The heating and cooling systems shall be operating before, during and after installation, with the humidity of the interior spaces maintained between 25% and 55%.

Rooms should have proper ventilation, especially in high moisture areas. There shall be no excessive build up of heat in the areas where panelling will be installed.

Prior to the start of installation, all exterior windows and doors are to be in place, glazed and weather-tight. The roof is to be watertight and all wet trades' work is to be completed and thoroughly dry.

Mechanical, electrical and other utility service installations shall have been completed.

1.05 SUBMITTALS

- A. Product Data: Woodfit Acoustics shall submit to the Project Architect three complete sets of CAD generated shop drawings prepared by the manufacturer showing all necessary dimensions and details required, which will subsequently be site verified and revised as required by the architect.
- B. Samples: A 300mm x 300mm sample (3 nr) with a finish applied shall be submitted for approval. Product shall be original production material in the finish specified for final use.
- C. Certification: Submit to the employer a certificate of compliance to specified acoustical and fire performance. When requested attach independent laboratory test results for each product used showing that the product supplied meets the specified requirements.

**WOODFIT ACOUSTICS FLAT LEATHER WOOD PANELLING WALL SYSTEM
ARCHITECTURAL SPECIFICATION**

1.06 PRODUCT DELIVERY AND STORAGE

- A. Woodfit Acoustics fabricated units and related components shall be delivered to the project site in original unopened packages for installation in accordance with a reasonable program furnished by the main contractor.
- B. Woodfit Acoustics Panels shall be stored in a fully acclimatized enclosed space for a minimum of seventy two (72) hours prior to installation. All panels shall be stored off the floor. On-site storage shall be such as to assure that all panels and associated materials are protected from damage.
- C. Care in handling must be exercised to avoid damage.

1.07 GUARANTEE

- A. Manufacturer: All materials supplied by Woodfit Acoustics shall be guaranteed against defects under normal operating conditions for a period of one (1) year from the date of shipment. Because of differing site conditions, colourings can vary with age and are excluded from this warranty.
- B. Contractor: All work shall be guaranteed for one (1) year from final acceptance of completed work.

PART 2 – PRODUCTS

2.01 FLAT LEATHER WOOD WALL PANELLING

- A. The wall panels as described in this section shall be manufactured by Woodfit Acoustics, Moydrum Road, Athlone, Co Westmeath, Ireland. Ph: + 353 (0)90 6478555 Fax +353 (0)90 6479220 Email: info@woodfitacoustics.com. Panels shall be pre-fabricated to sizes established by approved Woodfit Acoustic shop drawings and confirmed by site dimensions.

- B. Woodfit Acoustics Leather wall panel consists of a 50mm Class “O” fire rated sound absorbing acoustic foam, encapsulated within our perforated leather finish to create a module size of 1200mm x 600mm or 600mm x 600mm.

- C. Panels shall have noise reduction as per illustration chart.

Frequency	a
250	0.25
500	0.90
1000	0.66
2000	0.29

Open Area: - 3.14%
 Weight: - 9.25 Kg/M²
 Adjusted NRC Values: - 0.53*

The panels can be provided in a range of fire retardant core materials meeting class B, C and D.

*Sound absorption co-efficient for all the products reflect the on-site performance as opposed to a laboratory performance which may not represent real life situations accurately.

2.02 FITTING DETAILS

- A. The wall panels shall be attached to the structure using Woodfit Acoustic supplied components. Panels can be fixed by means of softwood battens/interlocking metal sections/ (other methods) in accordance with the drawing reference.....
- B. Installation: shall be in accordance with local code requirements, manufacturers' instructions and as shown on Woodfit Acoustics approved shop drawings and/or details. Installer shall provide for adjustments as required to maintain consistent alignment of panels and of finished panel faces and to ensure all fittings are in the proper locations.
- C. Joint Treatment: Panel to panel joints to be butted/ recessed/ rebated/ tongued and grooved/ loose tongued/ curved edge/ profiled edge/ (other) in accordance with drawing reference

2.03 EDGE, BANDS, SKIRTINGS, MOULDINGS AND PERIMETER TRIMS

Edges, bands, skirtings, mouldings and perimeter trims shall be designated by the specifier in accordance with the standard design details available. All Leather wall products specified shall be supplied by the manufacturer, in accordance with drawing reference

2.04 FINISHES AND COLOURS

- A. A wide range of colours are available on request. All leather can be produced in their natural finish or with a perforated grain pattern.

All leathers are tested to British Standards BS 6608:1985 and EN ISO 13336 for thickness, tear strength, flexing endurance, colour fastness, resistance to blocking, adhesion of finish and ph of aqueous extract.

In addition, the leather has been treated to include an integrated protected barrier against fire.

PART 3 - EXECUTION

3.01 PREPARATION

- A. Wall Layout: The contractor, prior to manufacture, when required shall take site dimensions to determine panel sizes prior to being manufactured. Prior to installation the contractor should determine the location of panel supports in accordance with installation instructions.
- B. Co-ordination: The contractor shall co-ordinate with other trades, the location of services which will penetrate the wall panels or that may interfere with the installation. Recessed or surface services located within the wall panels are to be located and cut on site.

3.02 INSTALLATION

- A. General: Installation shall be in accordance with general accepted procedures, local code requirements, manufacturers instructions and as shown on Woodfit Acoustics approved shop drawings and/details. Installation contractor shall provide for adjustments as required to maintain consistent alignment of panel faces and to ensure proper clip location.
- B. A Panel must only be handled by persons wearing clean cotton gloves. On installing panels and accessories do not handle the panels before putting on clean cotton gloves.

3.03 ADJUSTMENT, CLEANING, REPAIR AND REPLACEMENT

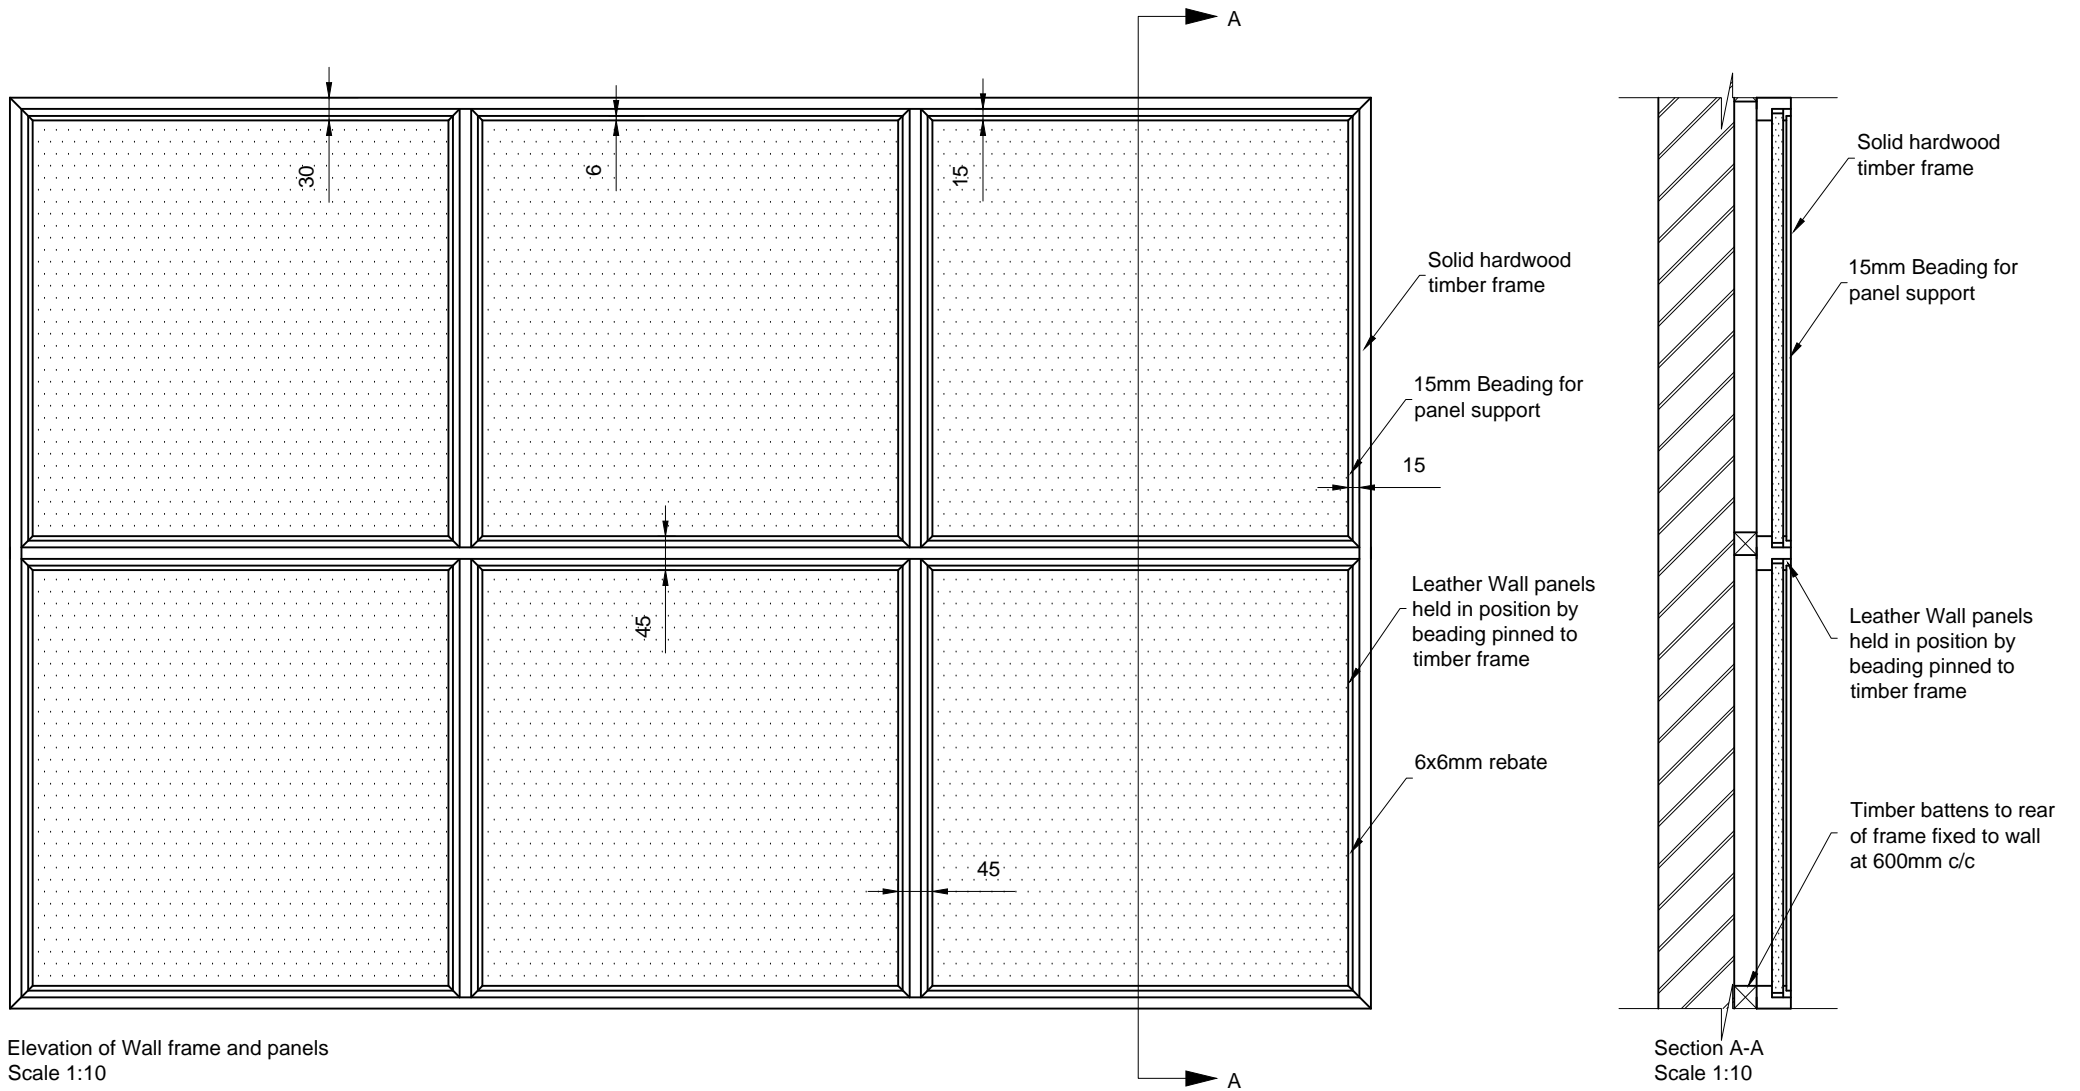

- A. The contractor shall inspect the installation and prior to completion make final adjustments to comply to all requirements as stated herein.
- B. When installation is complete, Woodfit Acoustics wall panels shall be cleaned in accordance with manufacturers' instructions.
- C. All panels which cannot be successfully repaired shall be removed and replacement of product improperly installed and not confirming to specified installation methods as detailed in section 2.02 A and B and as shown on approved shop drawings shall be the responsibility of the installing contractor.

**WOODFIT ACOUSTICS FLAT LEATHER WOOD PANELLING WALL SYSTEM
ARCHITECTURAL SPECIFICATION**

3.04 INSPECTION

THE CLIENTS representative shall inspect the installation and all finished surfaces to ensure that work has been carried out in a manner satisfactory to the CLIENT.

Any defective installed panels shall be corrected by the contractor at no additional cost to the CLIENT or to the manufacturer.
